Where the Wild Things Are, Continued...

The Wild Things wake up in the middle of the night. Once they realize Max is gone, they swim to the Sea Monster and he takes them to the village where Max lives. Then the monsters knock on the door. They find Max in his room with his wolf suit on, thinking about his friends, the Wild Things. His mother is vacuuming and goes to get a broom to scare the Wild Things and she hits them and they fall down, hurt. Max screams at his mom for hurting the Wild Things, screams at the Wild Things for breaking into the house and scarring his mom, tells them that *they* are banned from having any supper, and runs upstairs to get giant bandages. Max comes back down with five giant bandages and sees the Sea Monster in his back yard swimming pool where his dog is barking like crazy. The Sea Monster eats the dog but

spits him out because he is too hairy. Max's mom decides to take control of the situation and invites the Wild Things to stay for dinner after all. The Wild Things are very messy dinner guests.
